

FLTCTRL LAUNCHES FLOCK, A UNIQUE ONLINE BUSINESS AVIATION DIRECTORY

News / Business aviation

The screenshot shows the Flock.aero website interface. At the top, there is a search bar with the text "Search for an airport by its name, ICAO code, IATA code, city or country". To the right of the search bar are "Login" and "Create Account" buttons. Below the search bar, the breadcrumb trail reads: "Home page » Ras Al Khaimah International Airport » Ramjet Aviation Support". The main content area displays the profile for "Ramjet Aviation Support". It includes a "Have a business inquiry?" section with a "Contact Directly" button. Below this is the "Headquarter Contacts" section with details for Telephone (+971 7 207 7700), Email (ops@ramjet.aero), Fax (+971 7 207 7600), Web (http://www.ramjet.aero), AFTN (KMRKRJET), and Type B (RKTRJXH). There is also a "Contact at RKT, OMRK" section with similar contact details. To the right of the contact information is a "Description" section stating: "We provide the best worldwide aviation support services to our clients. Prompt, reliable and cost effective services: plain and simple. Ramjet Aviation is a one stop sole provider to ensure a pleasant journey experience, leaving you to focus on the aims or your trip rather than the trip itself. In short we provide you peace of mind." Below the description is a "Website" section with the URL http://www.ramjet.aero. At the bottom of the profile is a "Media" section with a grid of eight images showing various aviation-related scenes. At the very bottom of the page, there are sections for "Services at RKT OMRK" and "Pricing at RKT OMRK".

London-based aviation IT solutions company FltCtrl has launched Flock.aero, a new, community-based global online directory of airports, FBOs, ground handlers and providers which can be accessed by the business aviation industry free of charge.

Feedback from 250 operators suggests many paid-for directories remain static, leading to an abundance of out of date information. Furthermore, it seems updating information frequently involves a laborious process relying on third party input.

Flock has been designed to avoid these common inconveniences by allowing anyone to expand, correct and update the information in its databases. The directory also includes a 'Subscription' feature, which allows users to receive notifications when something changes on a certain profile.

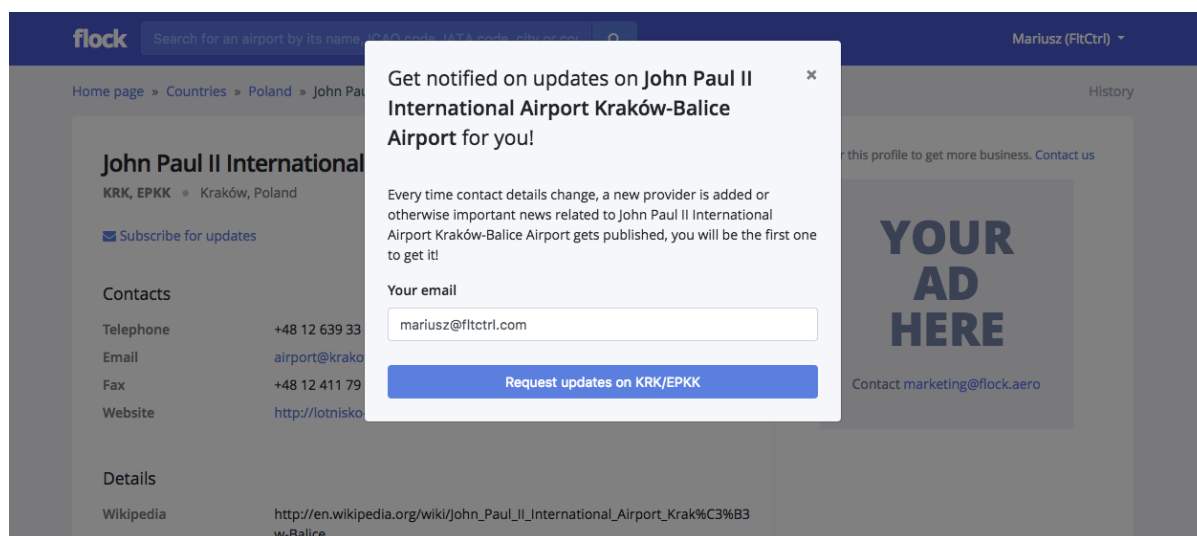

The new platform, which is being continuously verified, provides a comprehensive source of business information for aviation professionals, but also much more. Operators can surf all the data on Flock free of charge, but in the rare case they are unable to find the information they are looking for, they can contact Flock's dedicated support team, which is always available for all inquiries.

Suppliers are also able to claim their profiles for free, giving them the ability to manage their own content and increase their exposure among other Flock users.

“This is just the beginning for Flock,” explains Issam Sultan, Managing Director of FltCtrl. “We’re looking at evolving the platform into a marketplace, allowing users not only to find and share relevant business information but to quickly act on it, securing or selling services right on the spot. The aim is to save time, which can in turn save thousands of dollars.”

As of January 2018, the Flock database contains information on 38,653 airports and 4,006 companies working across 9,728 locations around the globe. However, FltCtrl is keen to increase its coverage and accuracy. To access the directory and build a profile, go to www.flock.aero.

If you have any feedback on the platform, including ideas on how its capabilities could be expanded, please contact support@flock.aero.
