

DIAMOND AIRCRAFT DISCOVERED FOREST FIRES

News / Events / Festivals, Manufacturer

The flight crews of the Austrian aircraft manufacturer Diamond Aircraft Industries GmbH, based in Wiener Neustadt, have discovered a starting forest fire during a test flight with the DA42 MPP (Multipurpose Platform) remote sensing aircraft equipped with a new camera system that has been tested for disaster relief. After assessing the situation and assessing the situation, the crew immediately contacted the tower of the Wiener Neustadt Ost (LOAN) airport, which had informed the responsible personnel who were not aware of this incident. The aircraft circled over the firebrand until the fire brigade arrived to control the situation and to report on the development.
