

FLYSCHOOL AIR ACADEMY RENEWS ITS CONFIDENCE IN ALSIM WITH A SECOND AL250

News / Maintenance / Trainings

Flyschool Air Academy in Spain renews its confidence in ALSIM in acquiring a second AL250 simulator for its new base in Mallorca. The AL250 simulator addresses initial phase training needs (PPL, CPL, IR/ME) and is SEP/MEP re-configurable simulator certified as an EASA FNPT II. In addition, it offers both classic and glass cockpit instrumentation for each flight model at the simple flick of a switch. This device has been extremely well received since its creation and more than 65 of these have already been installed and are in successful operation worldwide.

“We chose ALSIM again for the great professionalism and commitment of all their teams. In addition, the simulator AL250 is a very reliable device, with high quality details and offers all that the airline pilot needs. All this makes the customer experience unique and ALSIM is a key element and partner for the actual and future growth of Flyschool.” according to Rafael Lopez, General Director at Flyschool Air Academy.

“We are delighted to provide this second AL250 to Flyschool in less than 3 years and would like to thank them for their confidence. Installing this AL250 in Mallorca will enable them to provide high-

quality training standards and it's a good sign of trust not only in our simulators but also in our after-sales service. We look forward to continuing this successful cooperation between our companies." adds Nicolas de Lassus, Alsim Sales Account Manager.

Flyschool Air Academy is an ATO exclusively dedicated to aircraft commercial pilot training. The school is located in Madrid (Spain), where it totalizes 4 professional flight simulators, 15 Cessna & Piper aircraft, and its own maintenance center. This year, the school plans to open new locations to increase its capacity.

Today there are about thirty employees (the majority of them being pilots or co-pilots) to train the best pilots and the best candidates like the integrated programs, MCC and PBN.
