

DAHER'S EXTERNAL PAINT SCHEME CONFIGURATOR FOR TBM 900 AND TBM 930 VERY FAST TURBOPROP AIRCRAFT NOW AVAILABLE ON ITUNES APP STORE

News / Business aviation, Manufacturer

Daher announced the release of a new iPad application that allows future TBM 900 and TBM 930 owners to customize the paint scheme of their very fast turboprop aircraft, while also enabling TBM fans to visualize the airplane of their dreams.

This free-of-charge application displays a full 3D view of the TBM that enables the aircraft to be seen from all angles. For each area defined by one of Daher's two factory standard paint schemes, the user will be able to select a preferred color – assisted by a palette containing 105 different shades. A choice of aircraft registration styles also is offered, as well as the positioning of TBM 900/TBM 930 logos. After finalizing the configuration, the results are saved and made available as a PDF file or JPG image.

« Style definitely matters for TBM owners, and the personalization phase is very important during a new aircraft acquisition,” commented Nicolas Chabbert, Senior Vice President of the Daher

Airplane Business Unit. “By creating this configurator tool, we are providing a very realistic opportunity to visualize how the future airplane will look, enabling customers to define the external styling as early as possible.”

The App is downloadable for iPad [here](#)

You may complete your iPad TBM App collection at this link [too](#)
